

Incorporated

Subject: CRS Application Software Compatibility Certification

Dear Application Software Provider,

Thank you for taking the time to certify CRS provided hardware with your application software. CRS recognizes the importance of application software certification and the partnerships that it maintains with application software developers.

Some of the benefits that CRS offers its certified partners:

- CRS regularly includes information regarding application software compatibility in its marketing materials and promotional efforts including the CRS website, various CRS dealer newsletters, PR, product brochures and exhibition signage.
- CRS regularly participates in industry trade shows and exhibitions, and additionally sponsors dealer meetings and training events. From time to time CRS invites application software partners to participate with us at these venues.
- CRS regularly participates in the venues of application software developers. Please contact the CRS marketing department regarding opportunities of this type with your company.
- Links may be established and maintained from the appropriate areas of the CRS website to your website.

CRS provides hardware for use in software certification without charge, and will ship the appropriate product(s) freight prepaid. In order to finalize the certification, the following is required:

1. Please complete the enclosed application, indicating the hardware required and Fax or email the application to your CRS representative.
2. After receiving the appropriate CRS products, install and test the application in your lab, or field test, in accordance with your testing procedures.
3. Complete the Statement of Certification and return to CRS. Be sure to include any hardware requirements (i.e. CPU speed, RAM, screen resolution), installation notes, or software settings required to run the application.
4. It is extremely helpful for CRS to have a working copy of each certified software application in its technical support library. If your policy allows, please include a copy of your application with the certification.

If you have any questions, contact your CRS representative or the appropriate CRS product manager.
