Extra-Wide Cash Drawer for On-Counter POS

St. Paul, MN – Based on the popular CRS Model 93 cash drawer, the 93W is wide enough to serve as the base for typical POS workstation components, thus conserving valuable countertop space. A terminal or monitor, printer and keyboard can easily fit on top of the 93W. The versatile 93W incorporates an innovative dual voltage latch that can work in either 12v or 24v environments; interfaces cables for either voltage are included with each drawer.

“With linear steel ball bearing slides, and hardened steel wire bill weights, the Model 93W is built for reliable operation and long life” said Bruce Mann, CRS VP of Marketing. “The Model 93W offers great organization options for valuable media associated with cashless transactions. It features a full-size 5-bill, 5-coin till that when removed exposes a large space you can arrange to store checks, credit slips, coupons, or coin rolls.”

The Model 93W is the most cost effective wide format POS cash drawer in the market today. CRS Resellers can achieve even greater savings by purchasing SAM4s terminals, SNBC printers and CRS cash drawers in value bundles. Satisfied dealers have installed thousands of Model 93 drawers in a wide range of retail and restaurant POS applications.
